FOREWORD
563 The Obese Species: a special issue on obesity and metabolic disorders
Alessandro Bartolomucci, Stefano Parmigiani, R. John Rodgers, Antonio Vidal-Puig, Sarah E. Allan and Vivian Siegel

IN THIS ISSUE
565 Summaries of this issue’s research papers

RESEARCH HIGHLIGHTS
567 Introducing fat fish for anti-obesity drug screening
The serotonergic feeding-regulatory circuit: learning from worms
SP1 in fly neurons promotes positive energy balance
Bariatric surgery for T2D in obesity

EDITORIAL
569 Fat: an evolving issue
John R. Speakman and Stephen O’Rahilly

JOURNAL CLUB
574 Fasting, feasting and the glutamatergic synapse
Piya Ghose

A MODEL FOR LIFE
576 Leading the charge in leptin research: an interview with Jeffrey Friedman
Sarah E. Allan

OBITUARY
580 Zofia Zukowska
Bruce McEwen

AT A GLANCE
583 Brain–gut–adipose-tissue communication pathways at a glance
Chun-Xia Yi and Matthias H. Tschöp
588 The adipose organ at a glance
Saverio Cinti

SPECIAL ARTICLE
595 The evolution of human adiposity and obesity: where did it all go wrong?
Jonathan C. K. Wells

COMMENTARIES
608 Role of resting metabolic rate and energy expenditure in hunger and appetite control: a new formulation
John E. Blundell, Phillipa Caudwell, Catherine Gibbons, Mark Hopkins, Erik Naslund, Neil King and Graham Finlayson
614 Obesity and psychotic disorders: uncovering common mechanisms through metabolomics
Matej Orešič
621 Anti-obesity drugs: past, present and future
R. John Rodgers, Matthias H. Tschöp and John P. H. Wilding
## RESEARCH ARTICLES
