

FRONT RUNNERS

Cover: Histological section of the cartilage endplate including the annulus fibrosus and underlying vertebral bone from a 1-year-old mouse specimen, stained with Safranin-O/Fast Green. See article by McCann et al. on page 73.

DMM PODCAST

dmm.biologists.org

IN THIS ISSUE

- 1 **Summaries of this issue's research papers**

RESEARCH HIGHLIGHTS

- 2 **Identifying candidate ALS-associated genes in yeast**
Atherosclerosis: visualising oxidised LDL in zebrafish
Functionally repairing complex synaptic circuitry
Two routes to autism phenotypes via mGluR5

EDITORIAL

- 3 **The NIH Undiagnosed Diseases Program: bonding scientists and clinicians**
 William A. Gahl, Cornelius F. Boerkoel and Manfred Boehm

A MODEL FOR LIFE

- 6 **Breaking down barriers to clinical translation: an interview with Laurie Glimcher**
 Sarah E. Allan

CLINICAL PUZZLE

- 9 **Preeclampsia: multiple approaches for a multifactorial disease**
 Kathleen A. Pennington, Jessica M. Schlitt, Daniel L. Jackson, Laura C. Schulz and Danny J. Schust

SPECIAL ARTICLE

- 19 **Exploring the elephant: histopathology in high-throughput phenotyping of mutant mice**
 Paul N. Schofield, Peter Vogel, Georgios V. Gkoutos and John P. Sundberg

COMMENTARIES

- 26 **Modeling psychiatric disorders through reprogramming**
 Kristen J. Brennand and Fred H. Gage
- 33 **Studying synthetic lethal interactions in the zebrafish system: insight into disease genes and mechanisms**
 Vinita A. Hajeri and James F. Amatruda

PERSPECTIVES

- 38 **A model 450 million years in the making: zebrafish and vertebrate immunity**
 Stephen A. Renshaw and Nikolaus S. Trede
- 48 **Deconstructing host-pathogen interactions in *Drosophila***
 Ethan Bier and Annabel Guichard

PODCAST

- e1 **Paul Schofield, of Cambridge University, discusses the advantages of including histopathological analysis in large-scale mouse mutant phenotyping pipelines**
 Narrated by Sarah E. Allan

ORIGINAL RESEARCH

RESEARCH ARTICLES

- 63 **An inducible *kras*^{V12} transgenic zebrafish model for liver tumorigenesis and chemical drug screening**
Anh Tuan Nguyen, Alexander Emelyanov, Chor Hui Vivien Koh, Jan M. Spitsbergen, Serguei Parinov and Zhiyuan Gong
- 73 **Tracing notochord-derived cells using a *Noto-cre* mouse: implications for intervertebral disc development**
Matthew R. McCann, Owen J. Tamplin, Janet Rossant and Cheryle A. Séguin
- 83 **Repletion of TNF α or leptin in calorically restricted mice suppresses post-restriction hyperphagia**
Catherine Hambly, Jacqueline S. Duncan, Zoë A. Archer, Kim M. Moar, Julian G. Mercer and John R. Speakman
- 95 **A zebrafish transgenic model of Ewing's sarcoma reveals conserved mediators of EWS-FLI1 tumorigenesis**
Stefanie W. Leacock, Audrey N. Basse, Garvin L. Chandler, Anne M. Kirk, Dinesh Rakheja and James F. Amatruda
- 107 **A multiparametric approach to monitor the effects of γ -secretase inhibition along the whole intestinal tract**
Laure Droy-Dupré, Mickaël Vallée, Céline Bossard, Christian L. Laboisse and Anne Jarry
- 115 **The antiepileptic drug valproic acid and other medium-chain fatty acids acutely reduce phosphoinositide levels independently of inositol in *Dictyostelium***
Pishan Chang, Benoit Orabi, Rania M. Deranieh, Manik Dham, Oliver Hoeller, Jakob A. Shimshoni, Boris Yagen, Meir Bialer, Miriam L. Greenberg, Matthew C. Walker and Robin S. B. Williams
- 125 **Deletion of a single allele of the *Pex11 β* gene is sufficient to cause oxidative stress, delayed differentiation and neuronal death in mouse brain**
Barbara Ahlemeyer, Magdalena Gottwald and Eveline Baumgart-Vogt

RESEARCH REPORT

- 141 **Testosterone treatment fails to accelerate disease in a transgenic mouse model of spinal and bulbar muscular atrophy**
Erica S. Chevalier-Larsen and Diane E. Merry
