

FRONT RUNNERS

Cover: *Psat1* null (left) and wild-type (right) mouse embryos produced by the Wellcome Trust Sanger Institute as part of a global effort by the International Knockout Mouse Consortium (IKMC) to knock out each gene in the mouse genome. 'Deciphering the Mechanisms of Developmental Disorders' is a new programme using high-resolution 3D reconstructions to help phenotype embryos from IKMC knockout lines (such as *Psat1*) that are embryonic lethal. See Editorial by Mohun et al. on page 562.

IN THIS ISSUE

555 **Summaries of selected research papers**

EDITORIALS

557 **Provoking progress: a new chapter**

Vivian Siegel

559 **Bridging the gap between basic and applied biology: towards preclinical translation**

Ross L. Cagan, Monica J. Justice and George F. Tidmarsh

562 **Deciphering the Mechanisms of Developmental Disorders (DMDD): a new programme for phenotyping embryonic lethal mice**

Timothy Mohun, David J. Adams, Richard Baldock, Shoumo Bhattacharya, Andrew J. Copp, Myriam Hemberger, Corinne Houart, Matt E. Hurles, Elizabeth Robertson, James C. Smith, Tom Weaver and Wolfgang Weninger

A MODEL FOR LIFE

567 **Bench to bedside with fruit flies: an interview with Ross Cagan**

Kathryn Senior

SPECIAL ARTICLE

571 **Bloomsbury report on mouse embryo phenotyping: recommendations from the IMPC workshop on embryonic lethal screening**

David Adams, Richard Baldock, Shoumo Bhattacharya, Andrew J. Copp, Mary Dickinson, Nicholas D. E. Greene, Mark Henkelman, Monica Justice, Timothy Mohun, Stephen A. Murray, Erwin Pauws, Michael Raess, Janet Rossant, Tom Weaver and David West

REVIEW

580 **Caught in the act: revealing the metastatic process by live imaging**

Miriam R. Fein and Mikala Egeblad

ORIGINAL RESEARCH

RESEARCH ARTICLES

- 595 **Transmembrane voltage potential is an essential cellular parameter for the detection and control of tumor development in a *Xenopus* model**
Brook T. Chernet and Michael Levin
- 608 **Neurons and cardiomyocytes derived from induced pluripotent stem cells as a model for mitochondrial defects in Friedreich's ataxia**
Aurore Hick, Marie Wattenhofer-Donzé, Satyan Chintawar, Philippe Tropel, Jodie P. Simard, Nadège Vaucamps, David Gall, Laurie Lambot, Cécile André, Laurence Reutenauer, Myriam Rai, Marius Teletin, Nadia Messaddeq, Serge N. Schiffmann, Stéphane Viville, Christopher E. Pearson, Massimo Pandolfo and Hélène Puccio
- 622 **Functional and histopathological identification of the respiratory failure in a DMSXL transgenic mouse model of myotonic dystrophy**
Petrica-Adrian Panaite, Thierry Kuntzer, Geneviève Gourdon, Johannes Alexander Lohrinus and Ibtissam Barakat-Walter
- 632 **Olfactomedin-1 activity identifies a cell invasion checkpoint during epithelial-mesenchymal transition in the chick embryonic heart**
Alejandro Lencinas, Danny C. Chhun, Kelvin P. Dan, Kristen D. Ross, Elizabeth A. Hoover, Parker B. Antin and Raymond B. Runyan
- 643 **A new and clinically relevant murine model of solid-organ transplant aspergillosis**
Susanne Herbst, Anand Shah, Martin Carby, Gary Chusney, Naresh Kikkeri, Anthony Dorling, Elaine Bignell, Sunil Shaunak and Darius Armstrong-James
- 652 **Generation and validation of a zebrafish model of EAST (epilepsy, ataxia, sensorineural deafness and tubulopathy) syndrome**
Fahad Mahmood, Monika Mozere, Anselm A. Zdebik, Horia C. Stanescu, Jonathan Tobin, Philip L. Beales, Robert Kleta, Detlef Bockenbauer and Claire Russell
- 661 **In *Drosophila*, RhoGEF2 cooperates with activated Ras in tumorigenesis through a pathway involving Rho1–Rok–Myosin-II and JNK signalling**
Peytee Khoo, Kirsten Allan, Lee Willoughby, Anthony M. Brumby and Helena E. Richardson
- 679 **Mechanisms of *prickle1a* function in zebrafish epilepsy and retinal neurogenesis**
Xue Mei, Shu Wu, Alexander G. Bassuk and Diane C. Slusarski
- 689 **Elevated expression of the V-ATPase C subunit triggers JNK-dependent cell invasion and overgrowth in a *Drosophila* epithelium**
Astrid G. Petzoldt, Eva Maria Gleixner, Arianna Fumagalli, Thomas Vaccari and Matias Simons
- 701 **Pharmacological preconditioning with erythropoietin attenuates the organ injury and dysfunction induced in a rat model of hemorrhagic shock**
Kiran K. Nandra, Massimo Collino, Mara Rogazzo, Roberto Fantozzi, Nimesh S. A. Patel and Christoph Thiemermann
- 710 **An inducible knockout mouse to model the cell-autonomous role of PTEN in initiating endometrial, prostate and thyroid neoplasias**
Cristina Mirantes, Núria Eritja, Maria Alba Dosil, Maria Santacana, Judit Pallares, Sónia Gatus, Laura Bergadà, Oscar Maiques, Xavier Matias-Guiu and Xavier Dolcet
- 721 **Motor neurons and glia exhibit specific individualized responses to TDP-43 expression in a *Drosophila* model of amyotrophic lateral sclerosis**
Patricia S. Estes, Scott G. Daniel, Abigail P. McCallum, Ashley V. Boehringer, Alona S. Sukhina, Rebecca A. Zwick and Daniela C. Zarnescu
- 734 **Altered lipid homeostasis in *Drosophila* *InsP₃* receptor mutants leads to obesity and hyperphagia**
Manivannan Subramanian, Suman Kumar Metya, Sufia Sadaf, Satish Kumar, Dominik Schwudke and Gaiti Hasan

ORIGINAL RESEARCH

- 745 Sepsis otopathy: experimental sepsis leads to significant hearing impairment due to apoptosis and glutamate excitotoxicity in murine cochlea**
Joachim Schmutzhard, Rudolf Glueckert, Christian Pritz, Michael J. F. Blumer, Mario Bitsche, Peter Lackner, Manfred Fille, Herbert Riechelmann, Matthias Harkamp, Thongrong Sitthisak and Annelies Schrott-Fischer
- 755 A murine *Zic3* transcript with a premature termination codon evades nonsense-mediated decay during axis formation**
Jehangir N. Ahmed, Radiya G. Ali, Nicholas Warr, Heather M. Wilson, Helen M. Bellchambers, Kristen S. Barratt, Amelia J. Thompson and Ruth M. Arkell
- 768 From shape to cells: mouse models reveal mechanisms altering palate development in *Apert* syndrome**
Neus Martínez-Abadías, Greg Holmes, Talia Pankratz, Yingli Wang, Xueyan Zhou, Ethylin Wang Jabs and Joan T. Richtsmeier
- 780 Loss of the E3 ubiquitin ligase *LRSAM1* sensitizes peripheral axons to degeneration in a mouse model of Charcot-Marie-Tooth disease**
Laurent P. Bogdanik, James N. Sleigh, Cong Tian, Mark E. Samuels, Karen Bedard, Kevin L. Seburn and Robert W. Burgess
- 793 A necrotic stimulus is required to maximize matrix-mediated myogenesis in mice**
Drew Kuraitis, Maria Grazia Berardinelli, Erik J. Suuronen and Antonio Musarò
- 802 *H. pylori* virulence factor *CagA* increases intestinal cell proliferation by Wnt pathway activation in a transgenic zebrafish model**
James T. Neal, Tracy S. Peterson, Michael L. Kent and Karen Guillemin
- 811 Osteoarticular tissue infection and development of skeletal pathology in murine brucellosis**
Diogo M. Magnani, Elizabeth T. Lyons, Toni S. Forde, Mohammed T. Shekhani, Vyacheslav A. Adarichev and Gary A. Splitter
- RESEARCH REPORTS**
- 819 Behavioral abnormalities and Parkinson's-like histological changes resulting from *Id2* inactivation in mice**
Matthew C. Havrda, Brenton R. Paoletta, Nora M. Ward and Kathryn B. Holroyd
- 828 *piggyBac* as a high-capacity transgenesis and gene-therapy vector in human cells and mice**
Rongbo Li, Yuan Zhuang, Min Han, Tian Xu and Xiaohui Wu
- 834 The fraction of strongly bound cross-bridges is increased in mice that carry the myopathy-linked myosin heavy chain mutation *MYH4*^{L342Q}**
Johan Lindqvist, Hiroyuki Iwamoto, Gonzalo Blanco and Julien Ochala
